-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 December 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

ClaimS 16-26 ARE withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected INVENTION, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/20/02.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,5,6,8-13,27,28 are rejected under 35 U.S.C. 102(b) as being anticipated by Acton. This patent discloses a rock crusher having a cylindrical wear resistant band having reduced portions; note particularly figure 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Acton. The limitations of these claims would have been design choices only once the basic apparatus was known. For example, the particular material used for the band

would depend on several factors such as material being treated and desired maintenance costs.

Claims 1-15,27,28 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of Acton. APA is the apparatus discussed in the first few pages of the specification. This includes rock crushers having wear bands. Acton discloses several advantages of having bands with reduced portions. In order to provide for band advantages, it would have been obvious for one of ordinary skill in the art to modify APA by using a band having reduced portions, taught to be desirable by Acton. The remaining limitations of these claims would have been design choices only once the basic apparatus was known. For example, the particular material used for the band would depend on several factors such as material being treated and desired maintenance costs. Also, replacing defective parts by cutting and removing the damaged material and replacing it with new material is old and well known in the mechanical arts and of no patentable merit; see, for example, the subclass definitions of Class 29, subclasses 402.08, 402.11 and 402.12.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Rosenbaum whose telephone number is 703-308-1788. The examiner can normally be reached on Monday-Friday.
